

AI Intern

Job Description:

Support our R&D team in building and optimizing AI models for natural language processing and conversational agents.

Responsibilities:

- Collect, clean, and preprocess text data for NLP projects.
- Develop and train machine learning and deep learning models focused on language tasks.
- Use frameworks like TensorFlow, PyTorch, Scikit-learn, and NLTK.
- Implement retrieval-augmented generation (RAG) techniques.
- Evaluate model performance and document results.

Experience:

- Second year computer science student.
- Hands-on experience with Python and NLP libraries (e.g., NLTK).
- Familiar with large language models (LLMs) and RAG.

Skills:

- Proficient in Python, NumPy, Pandas.
- Experienced with TensorFlow, PyTorch, Scikit-learn.
- Strong NLP, LLM, and RAG knowledge.
