

Job Title: Agricultural Technician

Location: Sfax, Tunisia

Employment Type: Full-Time (Fixed-Term Contract)

Seniority Level: Entry-Level to Junior (0–2 years)

Job Description:

We are looking for an Agricultural Technician to support crop monitoring, machinery maintenance, and data collection on a modern farm using sustainable and precision agriculture techniques.

Key Responsibilities:

- Monitor crop health and growth through regular field inspections.
- Apply irrigation, fertilization, and pest control measures following agronomic guidelines.
- Operate and maintain agricultural machinery including tractors, pumps, and irrigation systems.
- Record field data and assist with agricultural experiments and yield assessments.
- Collaborate closely with agricultural engineers and farm managers in daily operations.

Required Skills:

- Basic knowledge of crop management, soil science, and plant diseases.
- Experience operating farm equipment and performing minor maintenance.
- Comfortable with data recording and reporting.
- Strong communication and teamwork skills.
- Ability to work outdoors in varying weather conditions.

Experience:

- Diploma or Bachelor's degree in Agricultural Technology, Agronomy, or related field.
- Previous internship or farm experience is a plus but not mandatory.
- Interest in precision agriculture and modern farming tools (e.g., sensors, drones) is desirable.
